

# REACHING FOR THE

# STARS

*Our scientific quest for fusion energy*  
*16. April, 18:15, ETH Zürich, HG F7*

# Could we use the unlimited power of the stars here on earth?

And where does the scientific quest for unlimited energy lead us?

Prof. Ian Hutchinson is Professor of Nuclear Science and Engineering at the Massachusetts Institute of Technology (MIT) and an expert on the physics of plasmas, the fourth state of matter. His research underlies the effort to generate practical energy from fusion reactions, the power source of the stars. His science is driven by two major motivations: the wonder and curiosity about the world, and the human desire to live well in it.
